

Transforming urban mobility

Sustainable transportation is critical for India's rapidly growing cities

40% of India's population to live in cities by **2030**

Average **time spent** every day in traffic in a metro city

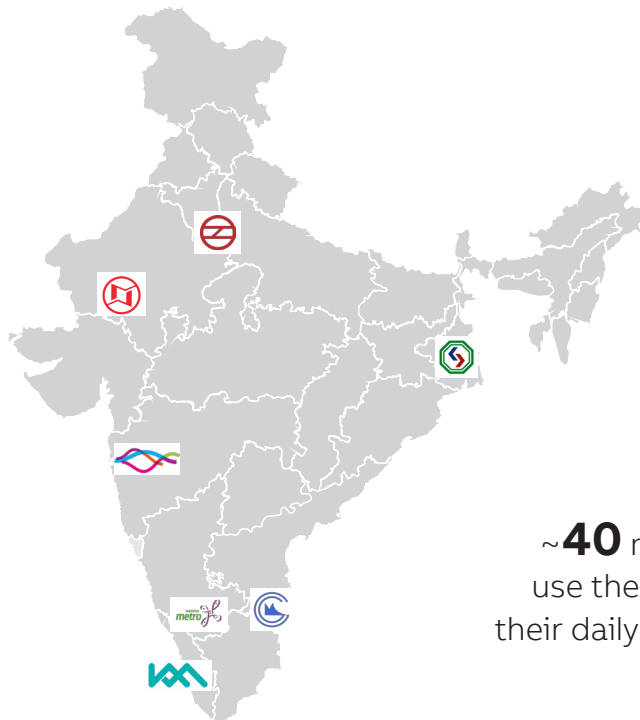

CO₂ emissions in India to touch **19.6 mn** tons in 2030

Metro network to double in **2 years** to more than **600** km

7 operational metros, 8 under construction and **16 planned**

~**40** mn people use the metro for their daily commute

ABB is providing global technologies made in India to **increase reliability and safety for commuters** across the country.

ABB's offering includes solutions for distribution, control and management of power in stations and coaches.
